1. cups into clouds:

i started with the cloud names: cirrus, cumulus, ~~nimbus~~ nimbus...
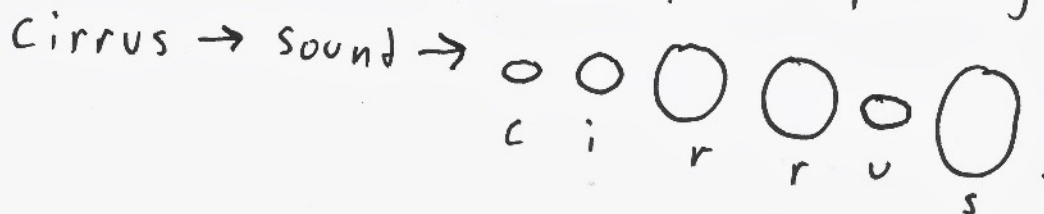

i found 26 resonant objects in my home: cups, ~~bowls~~ bowls, etc.

each object = 1 letter from the alphabet — thus to make

the cloud name cirrus into sound i would use the objects

that ~~as~~ equal: "C ~ i ~ R^2 ~ U ~ S" so:

Cirrus →

c   '   r   r   u   s.

i then used the circular opening of each object

to make a circle by tracing the openining. so:

Cirrus → Sound →

c   i   r   r   u   s.

i then used the circles as measurements to make wire

forms — thus the name of the cloud becomes sound

and then the sound becomes an object made from

the sound and name...

·cirrus → sound → circles →

in this is
name: cirrus
and the trace or
echo of the sound
that makes up the
name
